

Book greener, travel smarter

Using the Meeting Destination Finder and venue marketplace.

Why?

Organizations strive for informed decision-making regarding meeting destination, cost efficiency, and sustainability. With the Meeting Destination Finder's (MDF) intelligent data analysis, companies can preserve essential in-person interactions while reducing expenses and ecological impact.

The more meetings optimized, the more savings potential, the more the planet benefits.

What is the MDF?

The MDF suggests ideal dates and meeting destinations by analyzing extensive travel-related data in real-time. Its algorithms support informed driven decision-making covering CO2 footprint, travel, accommodation, and labor costs for your next meeting.

How does it work?

1. Enter your dates, times, and attendees' departure locations in [CONVIEN's](#) MPF.
2. Consider the suggested optimal meeting destinations based on CO2 emissions, travel costs, and attendee well-being.
3. Make informed decisions on the best date and destination suitable to your meeting needs.
4. Switch to [Meetingselect](#) to seamlessly book your venue and accommodations.

What are the benefits?

You'll save:

- ✓ Costs of travel, accommodation, and labor.
- ✓ Time with the MPF's algorithms and real-time forecasts.
- ✓ CO2 footprint with eco-friendly venues, CO2 calculators, and data insight.

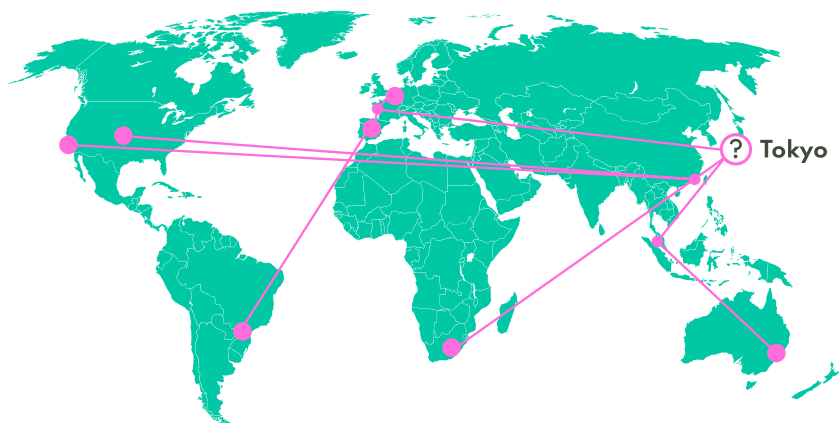

Selecting the optimal place, time, and way to travel:

- ✓ Boosts the productivity of bookers.
- ✓ Ensures the well-being of attendees and participants.
- ✓ Connects with Outlook and more.

All-in-one meeting management solution:

- ✓ Optimizes the end-to-end event planning process.
- ✓ Efficiently plans meeting, travel, and accommodation.
- ✓ Provides data access to improve future decision-making.

with Meeting Destination Finder

69% travel
expenses saved
(=17,069.44 €)

53% labor
cost saved
(=13,275.42 €)

48% CO₂
saved
(=2,769.69 kg)

The best meeting place for all participants is **Tokyo**!
